# Regulatory Reporting

Here, we will demonstrate how Mambu provides all the raw data necessary to enable end-to-end reporting. Mambu acts as a critical source of Banking related data that can be easily utilised

Mambu's APIs could be utilised to extract all relevant required data from the Database that is required for reporting. Below is a generic example of an end-to-end regulatory reporting flow

| Source Systems | → | Data Layer | → | Calculation Layer | → | Reporting Layer |

Granular Data Model

Aggregating raw data provided by Sources

Calculations/Statiscs
